

HYDRO-COOLER

COOLING SYSTEM FOR VEGETABLES

High Capacity Chilling of Produce prior to Packing

CONTROLLED REDUCTION IN
PRODUCE TEMPERATURE

FEATURES

- Capacities from 5tph to 30tph
- Mild steel or stainless construction
- Food quality modular transport system
- Electric variable speed drive
- Full width modular transport belt
- Probe controlled infeed
- Manufactured to suit individual refrigeration equipment
- V base tank with gate valve discharge
- Filter system for floating debris
- Suitable for most root crops including; potatoes, carrots and parsnips

HERBERT
